

IBRAHIM SHAIKH

Backend Developer

Pune, India — +91-7020062288 — [Email](#) — [GitHub](#) — [LinkedIn](#)

Summary

Backend-focused developer with 2 internships and 3 live projects. Comfortable building RESTful APIs and microservices with Spring Boot, JPA/Hibernate, and Python, working with MySQL, and integrating backend services with React.js frontends.

Skills

Languages: Java (OOP, Data Structures), Python, JavaScript

Backend: Spring Boot, REST APIs, JPA/Hibernate, Maven, Microservices

Database: MySQL, MongoDB

Frontend: React.js

Tools: Git, Postman

Experience

Frontend Developer Intern – Dreamcare Developers Pvt. Ltd.

Dec 2025 – Feb 2026

Hinjewadi, Pune

- Built the REST API-backed testimonials module and collaborated closely with the backend team on API contracts for a production React.js web app for a US-based law firm (admin dashboard, role-based access control).
- Resolved 15+ cross-browser compatibility bugs across Chrome, Firefox, and Safari using Chrome DevTools; coordinated with backend and QA teams over Git, cutting review cycle time by 20%.

Python Backend Developer Intern – Wexdi Software Services Pvt. Ltd.

Mar 2025 – May 2025

Remote (Hyderabad)

- Designed and built 5+ backend modules and CRUD REST APIs (attendance, task tracking) for an employee management portal using Python and MySQL, handling schema design and query logic.
- Wrote Python automation scripts that cut manual operational effort by 30%; debugged and optimized backend query performance and secure data handling.

Projects

Autonomous Ops AI – [Live Demo](#)

Next.js, React.js, TypeScript, NestJS, MySQL (Prisma)

- Designed and built a NestJS REST API (JWT authentication, OTP-based password reset, MySQL schema via Prisma ORM) powering a workflow-automation platform (n8n-style), including a sequential execution engine with configurable runtime nodes and execution logging.

AI Resume Analyzer – [Live Demo](#)

Java, Spring Boot, JPA, React.js, MySQL, Gemini API

- Built the Spring Boot REST API (JPA/Hibernate for MySQL persistence) for an ATS-style resume-analysis platform, integrating the Google Gemini API for resume scoring and job-match suggestions; improved job-match accuracy by 35% through keyword-matching logic.

Skin Disease Detection System – [Live Demo](#)

Python, PyTorch, Java, Spring Boot, JPA, React.js, MySQL

- Developed a Spring Boot backend (JWT auth, JPA, prediction history) as the API gateway in a microservices setup connecting a React frontend to a separate Python/PyTorch inference service for skin lesion classification; model achieves ~92% validation accuracy.

Education

Bachelor of Engineering, Computer Engineering – NMIET, SPPU

2023 – Present

Higher Secondary Certificate (HSC), Science – Shivbhumii Junior College, Pune

2022 – 2023

Secondary School Certificate (SSC) – Dnyandeep Vidyalaya, Talawade, Pune

2020 – 2021

Certifications

- Problem Solving (Intermediate) – HackerRank
- Responsive Web Design – freeCodeCamp
