

# IBRAHIM SHAIKH

Full Stack Developer

Pune, India — +91-7020062288 — [Email](#) — [GitHub](#) — [LinkedIn](#)

## Summary

Full stack developer with 2 internships and 3 live projects. Comfortable building frontends with React.js, backends with Spring Boot and REST APIs, and working with MySQL.

## Skills

**Languages:** Python, Java, JavaScript

**Frontend:** React.js

**Backend:** Spring Boot, REST APIs

**Database:** MySQL, MongoDB

**Tools:** Git

## Experience

**Frontend Developer Intern – Dreamcare Developers Pvt. Ltd.**

Dec 2025 – Feb 2026

*Hinjewadi, Pune*

- Built a production React.js web application for a US-based law firm, including an admin dashboard, role-based access control (RBAC), and a REST API-backed testimonials module used by the live client site.
- Resolved 15+ cross-browser compatibility bugs across Chrome, Firefox, and Safari using Chrome DevTools; coordinated with backend and QA teams over Git, cutting review cycle time by 20%.

**Python Backend Developer Intern – Wexdi Software Services Pvt. Ltd.**

Mar 2025 – May 2025

*Remote (Hyderabad)*

- Developed 5+ backend modules (attendance, task tracking, CRUD REST APIs) for an employee management portal using Python and MySQL.
- Wrote Python automation scripts that cut manual operational effort by 30%; optimized backend query performance and secured data handling logic.

## Projects

**Autonomous Ops AI – [Live Demo](#)**

Next.js, React.js, TypeScript, NestJS, MySQL (Prisma)

- Developed a workflow-automation platform (n8n-style) with a Next.js/React canvas for composing multi-step pipelines, backed by a NestJS REST API; implemented JWT authentication, OTP-based password reset, and a sequential workflow execution engine with configurable runtime nodes and execution logging.

**AI Resume Analyzer – [Live Demo](#)**

Java, Spring Boot, React.js, MySQL, Gemini API

- Built an ATS-style resume-analysis platform with a Spring Boot REST API and React.js frontend, integrating the Google Gemini API for resume scoring, job-match suggestions, and secure authentication (email verification, password reset).

**Skin Disease Detection System – [Live Demo](#)**

Python, PyTorch, Java, Spring Boot, React.js, MySQL

- Designed a skin lesion classification system: a Spring Boot API gateway (JWT auth, prediction history, dashboard analytics) connecting a React frontend to a Python/PyTorch inference microservice; model achieves ~92% validation accuracy across 25+ conditions.

## Education

**Bachelor of Engineering, Computer Engineering – NMIET, SPPU**

2023 – Present

**Higher Secondary Certificate (HSC), Science – Shivbhumii Junior College, Pune**

2022 – 2023

**Secondary School Certificate (SSC) – Dnyandeep Vidyalaya, Talawade, Pune**

2020 – 2021

## Certifications

- Problem Solving (Intermediate) – HackerRank
- Responsive Web Design – freeCodeCamp
